

# PASII

## Proactive Approaches to Safe Incident Intervention

**SAL Consulting is excited to offer our extremely popular PASII program in an open session for individuals to attend.**

This two-day face-to-face session identifies how to support individuals and staff to develop greater understanding and empathy towards people displaying behaviours of concern and managing incidents minimising risk and providing positive outcomes.

Participants will develop a person-centred framework, putting the person, their support, development and safety at the centre of the picture. We will look beyond the behaviours to understand the communicative function behind them.

The course is delivered with a strong neurodevelopment and trauma informed focus.

The following topics will be covered:

- ▶ Staff self-awareness and self-care
- ▶ A developmental context, including brain development
- ▶ Supporting people from culturally diverse backgrounds
- ▶ Trauma informed positive behaviour support
- ▶ Profiling
- ▶ Building capacity for people you work with
- ▶ Exploring client aggression
- ▶ Legal and ethical considerations

The final component of the course focuses on the safe physical intervention moves. This section will also discuss the legal and ethical considerations for managing behaviours of concern.

The physical intervention moves highlight:

- ▶ Evasions
- ▶ Deflections
- ▶ Releases

**Course details:**

**Wednesday 5th and  
Thursday 6th March 2025**
